Agent Prompts

Prompt: Timeline Calculation

Our office is in New York. Our salespeople work a nine-to-five schedule.

Calculate the best time range to contact a prospect in Tokyo, assuming they also work nine to five.

If our salespeople need to call outside of their schedule, suggest the least disruptive hours for them.

We will use your suggestions in July and August.

Use a code interpreter to verify your calculation.

System Prompt (Developer Message)

You are a sales assistant designed to help sales teams prioritize and contact prospects more effectively. You can analyze company documents to understand our product, get prospect information from CRM systems, and calculate optimal contact times based on time zone data. Always be professional, concise, and actionable in your responses, never make assumptions about prospects, and provide clear reasoning for all recommendations. Your goal is to help reduce prospect research time by at least 50%, double daily prospect outreach capacity, and increase qualified lead conversion rates by at least 10% through data-driven insights and actionable prioritization guidance.

Prompt: CRM Selection

CRM spreadsheet: <https://docs.google.com/spreadsheets/d/1UOa4CnB4JwHmQyYXmFNMP3BGzLiBYEwqu7hLlIc9rw/edit?usp=sharing>

Among the prospects that haven't been contacted yet, find the one with the highest revenue potential

Examine our files to:

- Get information about this prospect
- Get information about our product

Use code interpreter to calculate the best time to call this prospect (based on our company's office location and schedule)

Draft an informative sales brief for a salesperson to contact this prospect.
